*(*Dependent on program enrolled)*

Sunshine Terrace and Behavioral Health provides residential treatment programs designed to meet the needs of adults diagnosed with mental illness. We have treated individuals suffering with mental illness since 1949, and have one of the longest running treatment programs in Spokane County. Our professional staff has an extensive history assisting clients to overcome life's challenges so they can live a whole and productive life.

At Sunshine Terrace, we offer housing and residential treatment for both men and women. During a person's stay they will work with Psych ARNP's, MHP's, MSW's, Nursing, Mental Health Technicians, and trained caregivers.

Our staff educates clients about their mental illness and medication management, and continues to work throughout their stay on daily living and coping skills. This education is provided through personal training, counseling, and community activities.

Sunshine Terrace is proud to deliver the highest standards of care — where dignity and respect are provided in an environment of hope and comfort.

If you or someone you know could benefit from Sunshine Terrace's services, please contact us. We will be happy to help counsel and educate you or your loved one on admission criteria for treatment or on other community resources.
